PROFESSIONAL SUMMARY

Flutter developer with production experience shipping cross-platform apps to the App Store and Google Play across the social, e-commerce, fitness, and recruitment domains. Builds features end-to-end on Clean Architecture with Cubit/BLoC — payment gateway integration, real-time Socket.IO messaging, health-platform activity tracking, and push notification systems — working from Figma specifications through REST API integration to store release. Experienced in bilingual (Arabic RTL / English) products, with a background in network security and cryptography.

PROFESSIONAL EXPERIENCE

Information Technology Institute (ITI) — Damietta, Egypt

Trainee | Aug 2022 – Sep 2022

- Learned fundamentals of network security, firewalls, and VPNs.
- Analyzed malware types and implemented mitigation strategies.
- Gained hands-on experience in cryptography and risk management.

ATHR Company | [ATHR](#)

Flutter Developer | Aug 2025 – Present

- Developed and shipped production Flutter applications end-to-end — Clans, Tayseer Community, Yawm Al-Rashaka (Fitness Day), and Al-Madf Recruitment (Meesan) — from Figma specification to App Store and Google Play release.
- Built features on Clean Architecture (data / domain / presentation) with Cubit state management, GetIt dependency injection, Dio, and go_router across a multi-app product portfolio.
- Integrated third-party platforms including payment gateways, Firebase Cloud Messaging, Socket.IO, HealthKit / Health Connect, and Google Gemini, collaborating with backend teams on API contracts.

PROJECTS

Tayseer Community | Flutter, Firebase, Dart | Oct 2025 – Mar 2026 (at ATHR Company)

A modern social platform for the Muslim community, connecting like-minded users through smart compatibility matching, local event discovery, and secure private messaging.

- Built smart-matching feed with compatibility scoring and interest-based discovery.
- Implemented real-time chat, event discovery near the user, and community posts/comments.
- Shipped to the App Store with a polished, production-ready UI.

[App Store](#)

Clans | Flutter, Firebase, Dart | Aug 2025 – Oct 2025 (at ATHR Company)

A community and social-rooms mobile application enabling users to create and join clans, chat, and interact in real time, published on the Google Play Store.

- Developed core clan/room creation, membership, and social interaction flows.
- Collaborated on UI implementation from Figma design specifications.
- Contributed to release and publishing on Google Play.

[Play Store](#)

Yawm Al-Rashaka (Fitness Day) | Flutter, Dart, Cubit, Dio, Socket.IO | May 2026 – Present (at ATHR Company)

A dual-role fitness platform (client + specialist) covering diet and workout plans, activity tracking, real-time chat, and an in-app marketplace — 24 feature modules on Clean Architecture with 47 cubits and 92 use cases.

- Integrated the Paymob payment gateway with a hosted-checkout WebView, server-verified transaction status polling, and retry handling for declined, expired, and abandoned payments.
- Built real-time chat over Socket.IO with typing indicators, voice notes, media attachments, and paginated history.
- Implemented step and distance tracking through HealthKit and Health Connect, combining pedometer, GPS, and activity-recognition signals.
- Built the e-commerce flow end-to-end: cart, coupons, delivery addresses and branch pickup, checkout, and order history.
- Engineered JWT authentication with proactive token refresh and single-flight handling of concurrent 401 responses.
- Delivered AI meal scanning using the device camera with Google Gemini vision, plus an in-app AI coaching chat.
- Implemented FCM push and local notifications with deep-link routing to the correct screen per user role.
- Reduced network-image memory usage by ~90% through decode-size downsampling, and profiled rebuild scope and frame timing with Flutter DevTools.

Al-Madf Recruitment (Meesan) | Flutter, Dart | Mar 2026 – May 2026 (at ATHR Company)

A recruitment platform connecting clients with trusted, verified domestic and professional labor services, featuring profile browsing, service requests, and booking flows.

- Developed onboarding, service-category browsing, and worker profile screens.
- Implemented request/booking workflows aligned with Figma prototypes.
- Worked within a multi-page design system for consistent branding across screens.

Eslami | Flutter, Riverpod, Dart | Jul 2025

An Islamic app offering Quran reading and daily azkar, built with Riverpod for scalable, testable state management.

- Implemented Quran browsing/navigation and categorized azkar sections.
- Structured app state and data flow using Riverpod providers.

CERTIFICATIONS & COURSES

- Flutter Diploma — Route IT Training Center (2025)

EDUCATION

Bachelor of Computer and Artificial Intelligence

Sep 2019 – Jul 2023 | Damietta University, Damietta, Egypt

Graduation Project: Smart Attendance Tracker Mobile App — Grade: A

SKILLS

Flutter & Dart: Clean Architecture, Cubit / BLoC, Riverpod, GetIt (DI), go_router, Dio, flutter_screenutil, easy_localization (Arabic RTL / English)

Integrations: REST APIs, Socket.IO, Firebase (Auth, FCM), Paymob, Google Gemini, HealthKit / Health Connect, Google Sign-In, WebView, Geolocation & Maps

Data & Storage: Supabase, Hive, GetStorage, Flutter Secure Storage, SQL

Tools: Git, Flutter DevTools (performance & memory profiling), Google Cloud, App Store Connect / Play Console

Other Languages: Python, C#, HTML, CSS

Professional: Network Security Fundamentals, Cryptography, Risk Management, Team Collaboration, Attention to Detail, Customer Service, Data Analysis
